BASIC-ABSTRACT:

NOVELTY - A feedback information corresponding to a model case is transmitted from a registered user along with a variant point, to a data processing department (20). Relevant comment is output to the user from the processing department after analyzing and registering the feedback information.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is included for information communication support system.

USE - For supporting information communication within organization.

ADVANTAGE - Operating effectiveness of the organization is increased by transmitting relevant comment about the model case between the registered user and the processing department.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of information communication support system. (Drawing includes non-English language text).
